## 1 Year S&P 500 Performance Triggered account

79%

The S&P 500 Index 1-year returns have been positive 79% of the time over the past 20 years.<sup>1</sup>

Market uncertainty has people revisiting their retirement savings strategy. Until recently, many have turned to safer products, such as a low yield CD, for market protection. But a well-rounded portfolio that's built for retirement usually combines products that focus on either growth potential or market protection. What if a solution came along that offered both?

### Secure predictable growth while staying protected

Available with your Lincoln fixed indexed annuity, the 1 Year S&P 500 Performance Triggered account option is tied to the S&P 500 Index, which boasts a long track record of positive returns. In fact, over the past 20 years the index 1-year returns have been positive 79% of the time<sup>1</sup> — or roughly four out of every five years.

### How the account works

- Tracks the performance of the S&P 500 Index over a one-year indexed term
- Credits a specified rate if the index is flat or positive at the end of the indexed term — guaranteed
- You're covered with 100% downside protection when the index is negative

### Tracking the benefits of positive performance over the past five years

The composition of the index and the methodology used by the index to calculate its performance are not guaranteed and may be changed at any time by the index provider.

The exact terms of the annuity are contained in the contracts and any attached riders, endorsements and amendments, which will control the issuing company's contractual obligations. For more information about the annuity, please also read the Client Guide, Disclosure Statement and Fact Sheet or contact your representative.
