

Executive Select Program expands limits for high earners

MassMutual has made changes to address coverage gaps for top-earning executives! We have increased issue and participation limits for our **Executive Select Program**, giving eligible high-earning executives access to more individual disability income (DI) coverage beyond standard thresholds.

Executives who are in **occupation classes 5A and 4A** with annual earned income of **\$800,000 or more** can add **Radius Choice** coverage above the typical **\$35,000** limit through Executive Select.

Expansion supports high-income clients who may outgrow standard individual disability income limits and need coverage that better aligns with their earnings.

Our increased issue and participation limits:

- High indemnity disability coverage, **up to \$25,000**
- Individual DI coverage, **up to \$60,000**
- Group long-term disability coverage, **up to \$80,000**

Key points:

- The program offers **non-cancellable individual disability income insurance**.
- Policies are **medically and financially underwritten**.
- Coverage is issued under a **separate policy** and cannot be added to an existing one.
- **Extra premium** applies based on benefit period selected.
- Not available in **California, Florida, or Puerto Rico** or to **physicians or dental specialists**.
